Jerry Ng

Software Engineer

+65 9181 3598 | jerryngsw2@gmail.com | Singapore, SG | linkedin.com/in/jerry-ng-05ab18211/

PROFESSIONAL OVERVIEW

Web developer transitioning into applied AI engineering, with a strong technical foundation in Python, JavaScript, HTML/CSS, Bash and PowerShell. Experienced in building and deploying full-stack applications with Node.js, React, Next.js, SQL and RESTful APIs on AWS, alongside CMS platforms such as AEM and WordPress. Now focused on integrating AI into real-world products, bringing a process-improvement mindset and a track record of delivering efficient, scalable web solutions.

WORK EXPERIENCE

WEB OPERATIONS | Convertium, Singapore SEPT 2023 – MAR 2024

- Support the maintenance and performance of 10+ production websites across multiple Content Management Systems.
- Built automation scripts using Python, Bash, and PowerShell to replace manual operational workflows, cutting routine task time from hours to near-instant execution.
- Experimented with JavaScript for scripting and light web development work, contributing to front-end fixes and enhancements alongside the core operations role.
- Gained hands-on experience across multiple CMS platforms, including Adobe Experience Manager (AEM) and WordPress, for content publishing and site management.
- Conducted daily SEO audits across all 10 sites, identifying and resolving issues such as broken links and meta tag errors to maintain consistent search visibility and site health.

PROJECTS

OBS MEDICAL RECORDS MANAGEMENT | National Youth Council Singapore, Singapore APR 2023 – SEPT 2023

- Collaborated with stakeholders from the National Youth Council Singapore (NYC) to design and develop a web application for Outward Bound Singapore (OBS), digitizing medical form processing and eliminating paper-based registration workflows.
- Built the application using Node.js and the Express MVC framework, with PlanetScale (MySQL) for database management.
- Designed the application interface using Figma and Adobe Illustrator to ensure an intuitive experience for medical examiners and administrative staff.
- Followed Agile/Scrum methodology with bi-weekly sprints and client meetings, successfully delivering the final product to NYC within an 18-week timeline.

EDUCATION

Bachelor in Applied AI | Singapore Institute of Technology, Singapore Currently Studying
Diploma in Information Technology | Singapore Polytechnic, Singapore Graduated: 2024

SKILLS

- Languages: JavaScript, Python, HTML/CSS, Bash
- Technologies: Node.js, React.js, Next.js, AWS, SQL, Git, APIs, REST, AEM, SEO
- Competencies**:** SEO, Web Operations, Process Automation, Cross-site QA
